

HYGIENE POLICY

Ambassador Kindergarten- Dubai

Our school promotes a high standard of health and hygiene in its day-to-day work with children.

It is very important to prevent the spread of germs and illnesses that hygiene procedures are in place and strictly adhered to.

Children are encouraged to wash their hands after going to the toilet, playing outside and whenever the hands are dirty. They must also wash their hands before eating any meals or snacks.

We will assist the children in hand washing, ensuring that they are washing and drying them correctly.

We will provide clean towel in the bathroom each day.

We will explain to them the importance of safely throwing away dirty tissues to prevent the spread of germs. We will also encourage them to shield their mouths when they cough.

We will give health education classes to the children at regular interval regarding hygiene & other health related subjects.

Regular round will be done around the school, particularly the washrooms to check the cleanliness.

We will follow strict hygiene routines in our kitchen, ensuring that the fridge is at the correct temperature and that food is stored correctly in it, on a daily basis. We read the temperatures of every fridge and freezer in our setting and record these temperatures.
